Permanent Link to Javad GNSS tracks new BeiDou AltBoC signals

2021/07/29

Recently launched satellites of BeiDou Phase 3 program have started broadcasting new signals. Javad GNSS announced successful tracking of these signals and provided the adjacent figures. Interface control documents (ICDs) for B1C and B2A signals are available, while an ICD for the other signal, called B2B, has not yet been published. The company tracked the signal on the 1207.14 Mhz frequency on BeiDou's satellites 32, 33 and 34, and subsequently saw that this signal is available on all recently launched BeiDou Phase 3 satellites, and tracked it successfully. This B2B signal plus B2A signal together form an AltBOC(10,15) signal on 1191.795 MHz — JAVAD GNSS calls it BaltBOC. Assuming that BOC parameters of this signal are similar to Galileo's, the company tracked this. Figures 1 and 2 show BeiDou and Galileo (BaltBOC and altBOC) discriminator curves; they appear identical. Figure 1. BeiDou AltBoC signal. Red and blue: I of B2A(E5A) and B2B(E5b) sub-signals; purple and yellow: Q of B2A(E5A) and B2B(E5b) sub-signals (their sum is zero); green and aqua: I (early-minus-late) of B2A(E5A) and B2B(E5b) sub-signals. (Chart: Javad GNSS) Figure 2. Galileo AltBoC signal. Colors same as Figure 1. (Chart: Javad GNSS) According to another source, the signals are mentioned in some publications (Figure 3, 4 and 5 from an official Chinese government presentation at the International GNSS Service Workshop, Oct. 2018) and intended to be open signals, but an ICD is presently missing. However there appears to be some clarity now, that the modulation of B2a+b is an "ACE-BOC" modulation, which is similar to but formally different from "AltBOC." Figure 3. BDS-3 demonstration constellation. (Chart: Javad GNSS) Figure 4. Signals of test system BDS-3. (Chart: Javad GNSS) Figure 5. BDS-3 signal modulations. (Chart: Javad GNSS)
