Permanent Link to The benefits of the multi-GNSS future
2021/07/28

Galileo, BeiDou, QZSS, IRNSS, and more join GPS and GLONASS to bring you wider, broader, greater, more accessible and above all more accurate PNT. How to get all that's coming at you? Multi-GNSS paves the way for complete exploitation of new signals and constellations in navigation, surveying, geodesy and remote sensing. What exactly are the benefits of multi-GNSS, and how can you access them? For a start, download the multi-GNSS signal schema, and follow that up by attending a free webinar, "Multi-GNSS: Advantages, Challenges and Test Solutions." The free 1-hour webinar, which will take place at 1 p.m. Eastern [10 a.m. Pacific, 7 p.m. (1900h) Central European Time] on Thursday, Sept. 20, will review advantages of using multi-GNSS for the end-user and challenges in obtaining maximum efficiency when combining multiple constellations and signals. It will also discuss different approaches of testing GNSS receivers against jamming and spoofing attacks. You will learn: Advantages of using multi-GNSS Challenges when combining multiple constellations Robustness of multi-GNSS receivers to jamming and spoofing Test solutions for GNSS receivers. The webinar presents sponsored content by Skydel and Talen-X. Register for it here.
