Permanent Link to GNSS simulation critical for NAVWAR testing
2021/07/29

The BroadSim Advanced GNSS Simulator (Photo: Orolia) Orolia Defense & Security offers a range of solutions that support critical positioning, navigation and timing (PNT) systems for Navigation Warfare (NAVWAR) domains. Orolia is approved to work on the full spectrum of U.S. government classified and unclassified projects and is positioned to support strategic partnerships in the development of key positioning, navigation and timing (PNT) technologies for the defense market. BroadSim Advanced GNSS Simulator. Powered by the Skydel software engine, BroadSim provides software-defined features and benefits, with additional capabilities and specifications for applications requiring maximum security and compliance. With 100+ units fielded, BroadSim is trusted by the U.S. government, military and industry. BroadSim supports encrypted signals (Y-code, M-AES, and M-MNSA) and provides advanced jamming and spoofing simulation. Scalable configurations for testing CRPA/antenna electronics systems (anechoic and wavefront) are available. BroadSim has four independent RF outputs and runs on a custom Linux operating system. Interference Detection & Mitigation (IDM). Orolia's IDM technology is patented, rigorously tested and field proven for more than a decade, while regularly updated to conform to new and emerging threats. BroadShield provides embedded GPS jamming and spoofing detection, serving as a kill switch. BroadSense offers mobile detection for situational awareness, and ThreatBlocker provides protection with in-line detection and suppression. Resilient PNT. Orolia's resilient PNT solutions improve the reliability, performance and safety of customers' mission-critical operations for air, land, sea and space applications. The 8230 AJ GPS/GNSS anti-jam outdoor antenna is a high-gain (40-dB) GNSS outdoor antenna with a unique conical pattern that rejects interference from the horizon. IP67-rated, it is designed for harsh environments. The VersaPNT provides a rugged and resilient PNT source. The all-in-one customizable system delivers accurate, software-configurable PNT signals and high-performance for mobile applications in GNSS-degraded and denied environments.
